ESM-1

The ESM-1 (Endec Serial Monitor) is a stand-alone dual port serial data logger and relay device, geared specifically for EAS monitoring and weekly logging. It connects to the RS-232 serial port of any EAS Receiver and relays EAS log text directly to internet or local network via an Ethernet connection to SMTP and FTP. Small extruded aluminum case, LED display

POINTS

- Remote Multi-Site Tracking and Paperless Logging of EAS Alerts
- Create, Save & View Logs Online
- Filter, Search and Verify EAS Alerts with Included Software
- Meets FCC Weekly Log Requirements. Automates Most of the Task.
- Capable of Stand-alone Operation
- Time Stamped Data Sent to Server
- Retains 1 Year of EAS Data (Typical)

\$299.00

ESM-1+

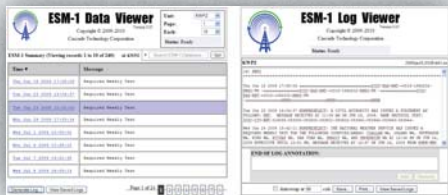

The ESM-1+ is an ESM-1 with an add-in EAS decoder board. The decoder board verifies on-air broadcasting of EAS alerts via station audio from one audio source (receives an 1/8" Mini-Stereo plug). It captures the full FSK text, analyzes the results and sends a brief report to the server, which integrates in with the server

This option will also provide Smart Silence™ detection with graduated alerting (coming soon), allowing options for how and when a contact person is reached during station audio failure.

POINTS

- Verify On-Air Transmission of EAS Alerts via Station Audio
- Verify Conformance to FCC Alert Specifications
- Smart Silence™ / Off-Air Detection with Graduated Alerts sent via a variety of methods (coming soon)
- Time Stamped Data sent to Server

\$449.00

ESM Data & Log Viewer - Included Software

ESM-1 Log Viewer Saved Logs - Included Software

Server / Client Side Software and Add-on Modules

The ESM-1 server and client side software (included with any ESM-1 package) allows paperless EAS logging. Users can filter, sort and search for EAS alerts, and create, save and view saved logs online, at any location with Internet access.

The ENDnet module adds more sophistication, allowing custom weekly report automation, display / printed data customization, statistics reports & more.

An EMC specific plug-in module allows ESM groups and classes to be monitored for a specific alert (such as a RWT / RMT), providing near real-time monitoring of EAS activity for all stations set up with an ESM-1 (or any product in the EAS WATCH system).

SERVER/CLIENT SOFTWARE: INCLUDED

ADD ON MODULES: QUOTE

ESM-1 1RU Rack Mount Option

The Rack Mount accessory provides a 1RU front panel in a similar style to the case faceplate.

\$50.00

ESM-1 Modem Option

Dialup modem option for locations without Internet access. Includes modem. Currently in development.

\$100.00
